

# Codeway Loop Control

**Works with  
any self adhesive  
label applicator**

## Turn your label applicators into print apply systems

**High Speed Printing  
Ribbon Saving  
Label width: 40-210mm**

  
**IDENTIFY:TRACK:CONTROL**

Loop feed is a simple, cost effective way to add printing to your on-line labelling systems.

### Printers and Applicators

Codeway make loop controls for all Avery Dennison 64 and AP5.4 label printers fitted with interface cards.

They'll work with any applicators, as well as Avery Dennison's ALS range.

### Integration

Codeway offers you several powerful ways to control label printing on packaging lines, including:

- Scan and Print - a reliable, easy way to control standalone and networked printing systems.
- Nice Label Enterprise – software to integrate labelling with your IT systems. Custom screens for PCs and wireless PDAs make on-line control as simple as possible.

In every case you'll get fast, secure access to all the data and graphics you need for your labels

### Benefits

1. Extend the life of your existing applicators and labelling systems.
2. Printer is totally independent.
3. ALS IP65-rated applicators can stay in situ for hosing down.
4. Printers are available for office use as well as print and apply.
5. An extra printer will covers your most vulnerable points, 24x7.
6. When necessary the applicator can be used in the normal way.
7. Standalone operation and network compatibility with back office systems.
