fast moving products

Codeway Blow Box heads for Avery ALS and ALX engines

Codeway CW-BB Blow Boxes are non-contact heads for applying self-adhesive labels to fast moving products.

They apply the last label dispensed to the pack, ideal for serialisation and traceability as well as batch labelling.

The CW-BB attaches to Avery ALX printer dispensers and the new range of Avery ALS applicators.

The air-jet pattern is configurable for different label shapes and sizes.

Codeway Blow Boxes are robust and designed for trouble free continuous use.

Photos show an Avery ALS 204 applicator with a Codeway Blow Box applying pre-printed labels to strawberry packs.

Specifications

System: automatic
Drive: pneumatic
Application: blow-on
Positions: top, side
Cycles: 120/min max
Label max: 110mm x 110mm
Label min: 25mm x 25mm
Product handling: conveyor
Line speed: up to 100m/max
Airstream: fan
Handing: left and right

Requirements

ALS20x or ALX92x
Machine Stand
Package Detector

Applications

Packs, boxes, cartons
on packing lines
