

Apply labels in  
inaccessible places

# Codeway Long Reach head for Avery ALS and ALX engines

Codeway Long Reach heads apply labels in inaccessible places, like the film path in Form Fill Seal machines.

In the photograph above you can see round labels going on to the underside of the film before the bag is formed.

The arm fits into a 100 mm gap under the film.

Systems with ALS applicators are ideal promotional labels and pre-printed batch labels.

ALX printer dispenser labels allow you to print and apply identification labels on demand.

#### Specification

System: automatic  
Drive: pneumatic  
Application: tamp-on  
Positions: top, bottom, side  
Cycles: 50/min max  
Label size (as shown): 71 mm x 41 mm  
Other label sizes: on request  
Stroke length: 80mm  
Control: dispenser  
Airstream: ejector  
Handing: left, right

#### Applications

Film labelling in vertical filling machines.

The ALS applicator feeds the label web along the arm for dispensing on to the pneumatic head (on the right).

#### Requirements

ALS/ALX Dispenser  
Machine Stand  
Package Detector
